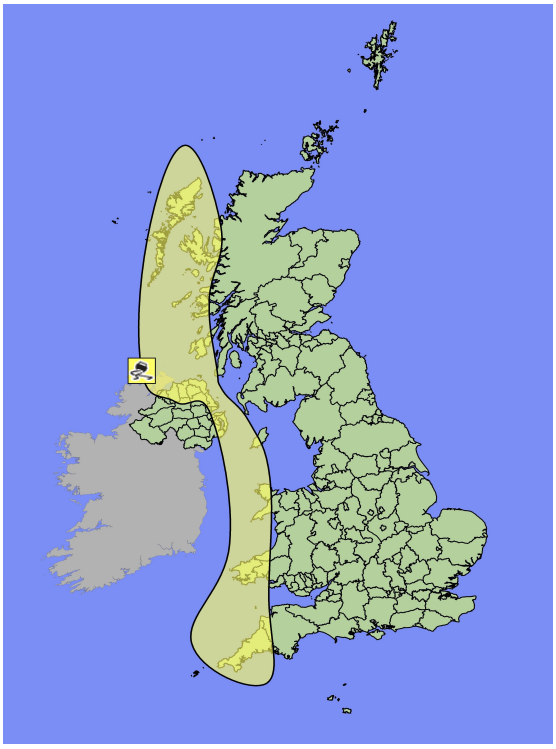
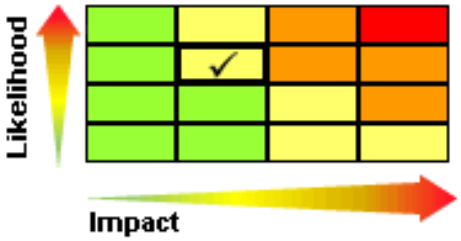
National Severe Weather Warning Service





Chief Forecasters Assessment
A cold northerly airstream will become established, bringing an icy start to Wednesday in some areas.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **21:00 on Tue, 12th Mar 2013** until **09:00 on Wed, 13th Mar 2013**

Wintry showers will become more widespread across parts of the far west of Scotland, Northern Ireland and some western fringes of England and Wales late on Tuesday and into the first part of Wednesday. Snowfall will be mostly restricted to high ground, where a couple of cm may accumulate, most likely for the Sperrins in Northern Ireland. Ice may well be more of a hazard, primarily on untreated surfaces.

The public should be aware of the risk of localised disruption to travel.
